Office of the  
Director General of Police,  
CID, Special Units & Economic Offences,  
Carlton House, Palace Road,  
Bangalore - 560 001  
Dated : 24 .07.2014.

To,  
The Medical Superintendent,  
Victoria Hospital,  
Bangalore.

Sir,

Sub : Request to constitute a Medical Board for the examination of accused Nithyananda Swamy.

Ref : [1] Bidadi PS Cr.No.141/2010 & 142/2010 U/s 376, 377, 506, 417, 201, 212 R/w 120[b] IPC.

[2] Hon'ble High Court of Karnataka Order No :

- \*\*\* -

With reference to the above said One Mr. Lenin lodged a complaint against accused persons Parmahansa Nityananda Swamy and others alleging that Parmahansa Nityananda Swamy had indulged in sexual abuse of his disciples and that some of his followers assisted him in committing the crimes. In this regard a case has been registered in CCB Branch Chennai in Cr.No.112/2010 U/s 295[A], 376, 377, 420, 506[1] R/w 120[B] IPC and another case was registered against him in Kovai CCB in Cr.No.16/2010 U/s 295[A], 420 IPC by Sri T.M.Vishwanath.

On the point of jurisdiction both the above cases were transferred to Bidadi Police Station, Ramanagara district, Karnataka and were re-registered in Crime No.141/2010 and 142/2010 respectively.

On the orders of DG & IGP Karnataka State, vide order No.23/CRIME/CR/RM/10 dated: 19.03.2010 these cases were transferred to CID for further investigation.

These two cases were investigated and the chargesheet was filed against the prime accused Swamy Nithyananda and his close associates for the offences punishable U/s 376, 377, 506, 417, 201, 212 R/w 120[B] IPC and further investigation is continued U/s 173[8] of Cr.P.C.

During the course of investigation it was revealed that the accused Nithyananda Swamy committed rape and unnatural sex, and other accused persons have assisted him in committing the

above offence etc. Hence Charge Sheet was filed before the Hon'ble JMFC Court, Ramanagara against them and the same was registered on file in CC No 204/2010.

Thereafter Hon'ble High Court of Karnataka passed the orders dated 16.07.2014 dismissing Crl.Petition No. 4582/2012, the petitioner/Accused No.1 Nithyananda Swamy in CC No. 204/2010 and directed him to cooperate with the investigation officer and he shall also voluntarily appear before qualified doctors identified by the I.O., to subject him self to medical test on the day and the date fixed by the said qualified doctors to conduct such test on him as the doctors deem fit pursuant to order dated 18.06.2012 pass the cc No 204/2010. Copy of the court order is herewith enclosed for your perusal.

Therefore I request you to constitute Medical Board to Examine the accused Nithyananda Swamy @ Rajashekaran and to give opinion on the following points.

1. Whether the accused Nithyananda Swamy is capable of performing sexual acts?
2. Whether there are any signs involving him in un natural Sexual acts?
3. Is there any possibility of drugs being used by the accused to reduce the sexual potentiality or to show temporary impotency. If so what is the nature of the drugs used?
4. Any other information with regard to any unusual symptoms noticed during medical examination, which is useful in the purpose of investigation.

As soon as the date is fixed from your end for the purpose of medical examination we will produce the accused no.1 Nithyananda Swamy for the said medical examination.

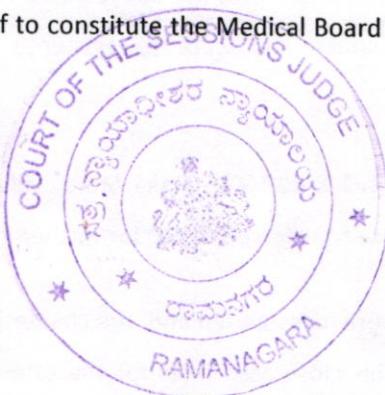

Hence we request your kind self to constitute the Medical Board and intimate the date and time of the Medical Examination.

Thanking you,

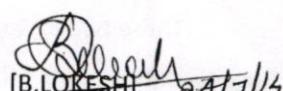

Revered.

Examination date is  
fixed on 6/8/14  
Requested to be  
produced at 9 AM  
on 6/8/14. The names  
of the members of Medical  
board will be intimated  
at a later date

24/7/14  
DR D. S. H. S. P. K.  
Medical Superintendent  
Victoria Hospital  
Bangalore

Yours Sincerely,

  
[B. LOKESH] 24/7/14  
Dy. Superintendent of Police.

Office of the  
 Deputy Superintendent of Police,  
 Special Enquiry Division, CID,  
 Carlton House, Palace Road,  
 Bangalore - 560 001  
 Dated : 04.09.2014.

To,  
 The Medical Superintendent,  
 Victoria Hospital,  
 Bangalore.

Sir,

Sub : Subjecting accused Nithyananda Swamy for Medical Examination before the Medical Board.

Ref : [1] Bidadi PS Cr.No.141/2010 & 142/2010 U/s 376,  
 377, 506, 417, 201, 212 R/w 120[b] IPC.

[2] Hon'ble Supreme Court Order Dtd : 03.09.2014  
 in SLP No: 5844/2014, 5897/2014, 5900/2014 &  
 6001/2014.

[3] My earlier letter dated : 24.07.2014.

THROUGH DEAN & DIRECTOR OF B.M.C.R.I.

With reference to the above I write to state that medical examination of accused Nithyananda Swamy was fixed on 06.08.2014 as per the directions of the Hon'ble High Court of Karnataka. Meanwhile a accused petitioners filed SLPs vide ref[2]. Hence, the medical examination could not be conducted on the said date.

Thereafter Hon'ble Supreme Court pronounced the orders dated 03.09.2014 dismissing all above four S.L.Ps and directed the accused submit themselves to medical examination [Vide Para 12 of the Supreme Court Order]

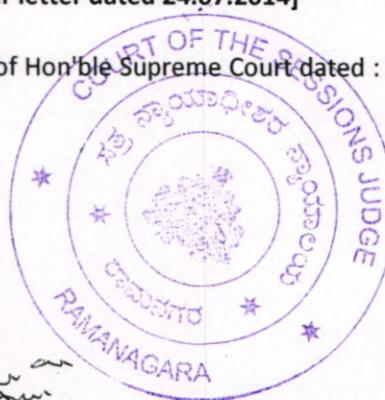

Hence in view of the above Hon'ble Supreme Court Order I request you kind selves to fix the date on 08.09.2014 at 08:00AM for the Medical Examination of the accused Nithyananda Swamy.

[On the points raised in my earlier letter dated 24.07.2014]

I am enclosing the order of Hon'ble Supreme Court dated : 03.09.2014 for your kind perusal and needful.

Thanking you,

*Forwarded to the Medical Superintendent, Victoria Hospital and forwarded to the accused on 08.09.2014 at 8 AM*

Yours Sincerely,

Sir,

Sub: Medical Examination of  
Sri Nithyananda Swamy

Ref: No 11/CRM/SE/CID/2010 Dt: 4/9/2014

This is to inform you that Sri Nithyananda Swamy appeared before the Medical Board constituted by the Medical Superintendent, Victoria Hospital at 8 am on 8/9/2014 at Institute of Nephro-Urology, Victoria Hospital Campus, Bangalore.

The Medical board obtained his consent for physical examination and blood investigations the report of which are pending.

The Medical board suggested to perform Penile doppler study with intracavernosal injection of vasoactive drugs which was essential

As part of investigation. Medical team explained to him regarding the procedure and complications of intracavernosal injection. He has refused to give consent for penile doppler study with intracavernosal injection of vasoactive drugs. He was asked to give in writing that he does not want to undergo the alone procedure, he has refused to give it in writing.

The Medical board panel of doctors collectively state that he has refused to consent for the alone said procedure and also refused to give it in writing.

 Ref By : Dr. C R CHANDRASHEKAR  
 Date : 08-09-2014  
 IP/OP no. : 120319

**Examination : SCROTAL DOPPLER**

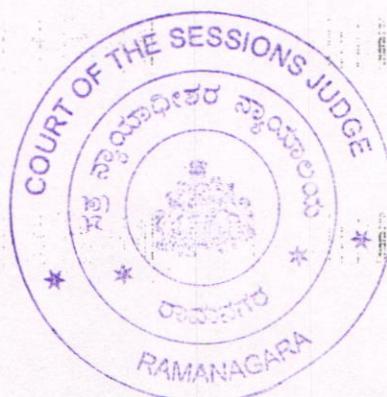

**FINDINGS:**

- Both testes are normal in shape, position and vascularity. No focal lesions, Seen on either side.
- Both epididymal heads appear normal.
- No significant hydrocele seen on either side.
- Significant varicocele seen on either side.
- No flow reversal seen on valsalva on either side.
- Right testis size : 3.5x1.7x2.9cms
- Right epididymis head : 0.7 x 0.7cms.
- Left testis size : 3.2x 1.7x2.9 cms.
- Left epididymis head : 0.9 x 0.7 cms.
- Right scrotal sac shows calcification measuring ~ 0.29 cm.

**IMPRESSION:**

- CALCIFICATION IN RIGHT SCROTAL SAC AS MENTIONED ABOVE.

Name	Age	Sex	Ref by prof Dr	Unit	IP/OP No	Date
INU 0809	12y	Male	C R Chandrashekhar	Uro-II	120319	08-09-2014

Real time sonography of Abdomen and pelvis with KUB region was performed and following features were noted.

LIVER : Normal in size, shape with diffuse increase in echogenicity.  
Portal and biliary radicals are normal.  
PV and CBD are normal.

GALL BLADDER : Moderately distended, wall thickness appears normal. Contents clear.

PANCREAS : Head and body appear normal in size and echotexture.

SPLEEN : Normal in size & echotexture. No focal lesions.

KIDNEYS : Both kidneys are normal shape, position.  
There is no calculus/ hydronephrosis.  
Both kidneys show normal in cortical echogenicity.

	Length(cm)	Width(cm)	Cortical width(cm)
RK	11.6	4.6	1.3
LK	11.2	5.0	0.9

URINARY BLADDER : Well distended, wall thickness appears normal

PROSTATE : Measures ~ 3.9 x 3.2 x 2.7 cm, -18.1 cm in volume.

Normal in size and echotexture

OTHERS : There is no evidence of free fluid in the peritoneal cavity.

**IMPRESSION:**

- HEPATIC STEATOSIS.

**PENILE DOPPLER STUDY  
(WITHOUT INTRACAVERNOSAL INJECTION)**

Flaccid state Doppler assessment showed insignificant blood flow.  
 Both the cavernosal arteries show normal anatomy with adequate side branches (min of 3) in the root, proximal & mid shaft regions. Few collaterals from the dorsal penile artery are noted in the root augmenting both the cavernosal arteries bilaterally

Flow parameters in the Cavernosal arteries are as follows:

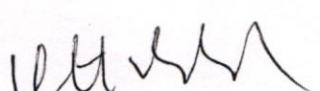

RIGHT SIDE			LEFT SIDE	
	PSV	EDV(cms/sec)	PSV	EDV(cms/sec)
BASELINE	6.7	-	14.1	-

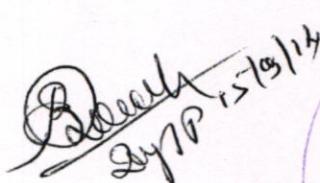

Both corpora cavernosa are normal in echotexture with no focal lesion seen.  
 Right cavernosal artery measures ~ 0.085 cm in diameter.  
 Left cavernosal artery measures ~ 0.072 cm in diameter.

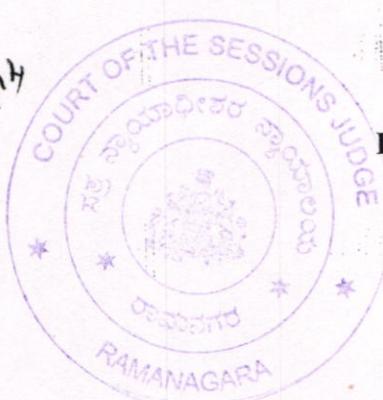

**IMPRESSION:**

**PENILE DOPPLER STUDY WITHOUT INTRACAVERNOSAL INJECTION WAS  
PERFORMED.**

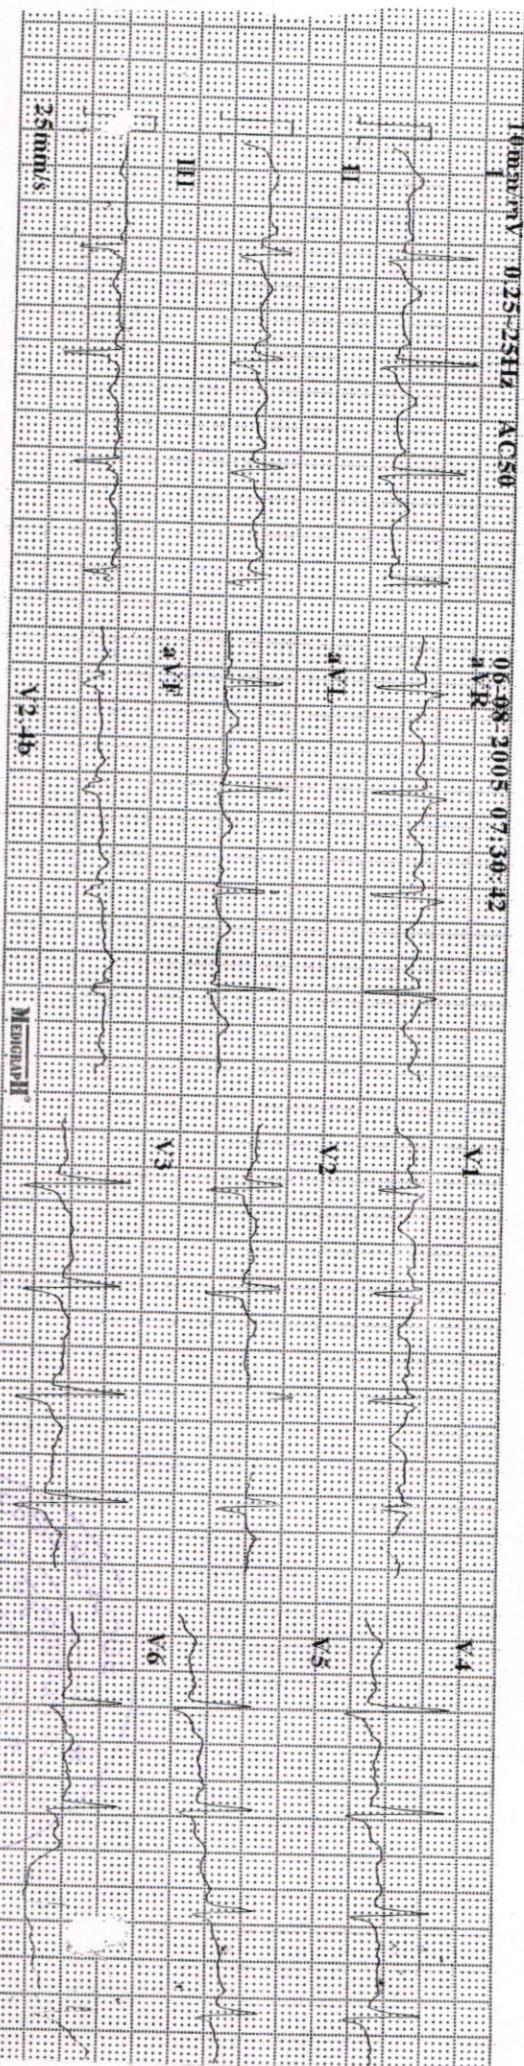

- **BASELINE STUDY SHOWED THE ABOVE PEAK SYSTOLIC VELOCITIES  
AS MENTIONED.**

**Bio-chemistry**

Parameters	observed values	biological reference range
------------	-----------------	----------------------------

## Fertility profile

Follicle stimulating hormone	2.50mIU/ml	FSH males :1.5-12.4
------------------------------	------------	---------------------

Luteinizing hormone	<0.216mIU/ml	male:1.7-8.6
---------------------	--------------	--------------

Prolactin	9.90 ng/ml	men-4.04-15.3
-----------	------------	---------------

Note when determining prolactin it should be remembered that the measured concentration is dependent on when the blood was taken ,since secretion of prolactin occurs in episodes and is subject to 24 hr cycle .Tether release of prolactin is promoted physiologically by stress. In addition elevated serum prolactin concentrations are caused by a no of pharmaceutical agents e.g.dibenzodizepines,phenothiazine),TRH and estrogens ,the release of prolactins is inhibited by dopamine ,L-dopa and ergotamine derivatives ,ng/ml

## Total and free testosterone

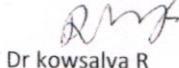

Testosterone	12.50 ng/dl	men :20-49:249-83>50yrs:193-740
--------------	-------------	---------------------------------

Sex hormone binding globulin (SHBG)	23.59 nmol/L	males 14.5 to 48.4nmol/L
-------------------------------------	--------------	--------------------------

Free testosterone	0.25ng/dl	males 5.88to 18.35 females ;0.12to 1.12
-------------------	-----------	---

Bioavailability of testosterone	6.59ng/dl	male 137.7 to 429.1,female 2.30 to 26.8
---------------------------------	-----------	---

Serum albumin (BCG)method	4.8 gm%	3.5-5.2 gm%

The results of this or any other diagnostic kit should be used and interpreted only in the context of the overall clinical picture

A negative test does not exclude a possibility of exposure or infection HIV levels of HIV antibodies may be undetectable in the early stages of infection. Heterophilic antibodies in the serum or plasma samples may cause interference in immunoassays. These antibodies may be present in blood samples from individuals regularly exposed to animals or animal serum PRODUCTS .Results of which are inconsistent with clinical observations indicate the need of additional testing .

(An Autonomous Institute of Government of Karnataka)  
Victoria Hospital, Bangalore**

Sri Nithyananda Swamy aged 37 years submitted himself for Medical examination as per circular number V H/GNL/37/14-15 Dated 5<sup>th</sup> September 2014 at Institute of Nephro-Urology, Victoria Hospital campus, Bangalore on 8<sup>th</sup> September 2014 at 8am.

He was received at the hospital by the Medical Superintendent of Institute of Nephro-Urology and taken to Special ward No 1 in second floor of Institute of Nephro-Urology where the Medical examination was planned.

The Medical team which was formed by the Superintendent, Victoria Hospital to conduct the Medical examination of Sri Nithyananda swamy comprised of

1. Dr C R Chandrashekhar – Professor and Head of the Department, Department of Urology, Institute of Nephro-Urology, Victoria Hospital campus, Bangalore
2. Dr Veeranna Gowda K M – Professor of Medicine, Victoria Hospital , Bangalore
3. Dr Chandrashekhar H – Professor & Head of Department of Psychiatry, Victoria Hospital, Bangalore
4. Dr Venkat Raghava S – Professor & Head of Department of Forensic Medicine, Victoria Hospital, Bangalore

The Medical team was introduced to Sri Nithyananda Swamy by the Medical Superintendent of Victoria Hospital and Medical Superintendent of Institute of Nephro-Urology, Bangalore.

Medical team explained to Sri Nithyananda Swamy regarding the procedure which would be adopted for the Medical examination. He was explained in detail regarding the consent for all the procedures which would consist of History taking, Physical Examination , Laboratory investigations and special tests which would include Ultrasound scan, Penile Doppler study with injection of Intracavernosal injection and Blood samples to be sent to the Forensic science laboratory.

2

Deepl

Jes

S. Venkata Rao

Deepl 28/09/14

**Government of Karnataka  
Bangalore Medical College & Research Institute  
(An Autonomous Institute of Government of Karnataka)  
Victoria Hospital, Bangalore**

Sri Nithyananda Swamy consented for History taking , Physical Examination , Laboratory investigations but did not consent for Penile Doppler study with Intracavernosal injection in spite of counselling him regarding the need for test. He refused to document it in writing regarding refusal of consent for penile Doppler study with intracavernosal injection.

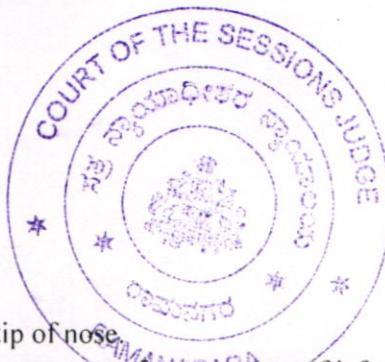

The Medical team recorded his refusal to consent for Penile Doppler study with intracavernosal injection and tests of Blood and Urine in Forensic science laboratory in the presence of two witnesses , the document has since been handed over to the Investigating officer.

Sri Nithyananda Swamy refused to permit Audio-video recording of the tests which was conveyed to the Investigating officer.

Medical team decided to perform the examination as explained earlier and the details of which are as follows

**Identification :**

Sri Nithyananda Swamy  
s/o Late Sri Arunachalam,  
Nithyananda Dhyana Peetam  
Nithyananda Puri, Kallugopahalli  
Off Mysore road, Bidadi - 562109

**Identification Marks :**

1. A pin head sized Black mole over tip of nose.
2. A pin head sized Black mole over upper part of outer aspect of left arm.

He was well built and nourished . Height : 175cm Weight : 80.8kgs

Chest measurement at level of Nipple : 95-100cm

Abdominal girth at the level of Umbilicus : 97cm

Development of Hair

- A) Beard & Moustache – Cleanly shaven, Hair follicles present.
- B) Axillary region – Shaven, Hair present at places , black in color , 2-3cm in length
- C) Pubic hair – Shaven, Hair present at places, Black in color, 4-5cm in length

Local examination : Thighs – Normal

Scrotum – Normal

Testes – Both testes present in Scrotal sac

Penis length – 10cm Circumference at the mid shaft – 8.5cm in flaccid state.

Foreskin – Intact. Glans penis – Normal

HISTORY TAKEN BY THE MEDICAL TEAM :

He is a known Diabetic since 2004 and Hypertensive since 2003. He is on following medications since then

1. TABLET GALVUS MET 50/500 TWICE DAILY
2. TABLET GLYCOMET GP2 TWICE DAILY
3. TABLET HOPACE – H TWICE DAILY
4. CAPSULE BIOSTAR GOLD TWICE DAILY

As per his statement he is not consuming any other medications.

He states that he was given Sanyasa at the age of 10 years and continued to be spiritual and reports to perform Kundalini yoga which makes his body unresponsive to sexual urge. He states that he had no sexual activities during his life time. He has no history of Masturbation or wet dreams. Denies having any erections. No history of Urinary symptoms or Urinary tract infections in the past. No history of headache. No history of smell disturbances. No history of visual disturbances. History of having undergone surgery in the past on his Right forearm.

#### PHYSICAL EXAMINATION FINDINGS OF THE MEDICAL TEAM

He is well built and nourished. Not anaemic. No jaundice. No thyromegaly. Clinically euthyroid. No pedal edema. Face is moon shaped. Bilateral Gynaecomastia present. Phenotypically appears male.

Vitals signs : Pulse : 82 per minute, regular, sinus rhythm. Vessel wall not thickened.

Blood pressure : 140/90 mm of Hg in Left Upper limb.

Temperature : Normal

Respiratory rate : 18 per minute.

#### SYSTEMIC EXAMINATION

Respiratory System : Bilateral Vesicular breath sounds heard. No abnormal sounds heard

Cardiovascular System : S1 S2 Normal. No added sounds, No murmurs.

All peripheral pulses well felt

Per Abdominal Examination : No organomegaly, No bladder distension. Hernial orifices intact

No abdominal striae

Central Nervous system : Conscious, well oriented to time and place. Pupils – 3mm, bilateral, equal and reactive to light. No neurological deficits. Gait – Normal.

Attention could be aroused and sustained . Memory was normal. Judgement intact. Speech – Normal

Thought – Stream

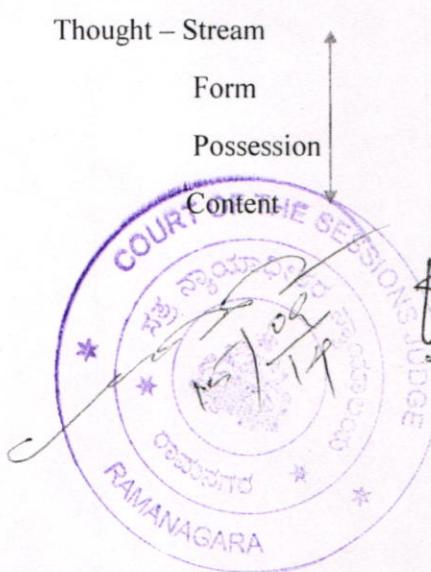

Form

Euthymic, Denied any perceptual anamolies.

**External Genitalia :** Penis appears normal. Penile length in flaccid state is 10cm in length from pubic symphysis and mid shaft girth is 8.5cm in flaccid state. Prepuce normal. External Urethral meatus is normal.

**Bilateral testes** appears normal in size , firm in consistency, testicular sensation present. Both Epididymis appears normal. Vas felt bilaterally and normal. No clinical evidence of Varicocele.

**Per Rectal examination :** Anal sphincter tone normal. Sentinel pile present. Prostate Grade 1 enlargement , firm in consistency, Tenderness on palpation. Rectal mucosa over the prostate normal. Perineal sensations normal. Bulbocavernous reflux intact.

**INVESTIGATIONS:**

Following investigations were performed on Sri Nithyananda Swamy

Urine – Routine analysis -	Color – Yellow	Sugar – 1.5%
	Appearance – Clear	Protein - Traces
	PH – 6.0	Pus cells – 0-1
	Specific gravity – 1.030	Epithelial cells – Nil
	RBC – Nil	Casts/Crystals – Absent

**COMPLETE BLOOD COUNT :** Hb – 13.9gm/dl PCV – 43.7%

Total WBC count – 7070 cells /cu.mm

Neutrophils – 88.5% Lymphocytes – 10.3%

Eosinophils – 0 Monocytes – 1.1%

Basophils – 0.1%

**SCROTAL ULTRASOUND SCAN :**

Both testes normal in shape , position

Right testis – 3.5 x 1.7 x 2.9 cms Volume of 12.04cc

Left testis – 3.2 x 1.7 x 2.9 cms Volume of 11.4cc

Both Epididymis normal. Right scrotal sac calcification measuring 0.29cm.

**PENILE DOPPLER STUDY ( Without intracavernosal injection )**

Flaccid state Doppler assessment showed normal blood flow. Both cavernosal arteries show normal anatomy with adequate side branches ( min of 3 ) in the root, proximal and mid shaft regions. Few collateral from the dorsal penile artery are noted in the root augmenting both the cavernosal arteries bilaterally.

Flow parameters in Cavernosal arteries are

Right side – Baseline – Peak systolic velocity – 6.7cm/sec

Left side – Baseline – Peak systolic velocity – 14.1 cms/sec

Both the corpora are normal in echotexture with no focal lesion seen.

Right cavernosal artery measures 0.085cm in diameter

Left cavernosal artery measures 0.072cm in diameter.

### **INTERPRETATION**

History and Psychological examination did not reveal any gross psychopathology. On Physical examination he appears to be phenotypically male with well built physique for his age with BMI of 26.40. He has features of moon face with Bilateral Gynaecomastia. The External Genitalia is well developed and normal for his age which indicates that he did not have any testosterone deficiency during his pubertal age. His systemic examination is normal. His urine routine examination is normal except for sugar which is 1.5%. His complete blood picture is normal except for eosinophil count which is 0%. This suggests he is not suffering from anaemia and his blood cell components are being produced normally. His renal biochemical investigations is normal. The tests done in the blood do not point towards any sexually transmitted disease. His fasting blood sugar is high(193mg%)

His Serum FSH and Serum Prolactin levels are within normal limits. Serum Lutenizing hormone is very low. His Serum Testosterone ( Total, Free, Bioavailable) levels are low with normal serum albumin levels. His Serum FSH and Prolactin levels being normal with a very low Serum LH rules out Primary Hypogonadism. His Serum TSH and Serum T3 are normal. His Serum T 4 levels are slightly raised. He does not have any clinical and laboratory findings which point towards pituitary causes of Hypogonadism. His Serum Testosterone being very low with a low leutinizing hormone suggest secondary causes of Hypogonadism which could be due to various causes including blockage of testosterone by exogenous sources. His serum cortisol levels are low .

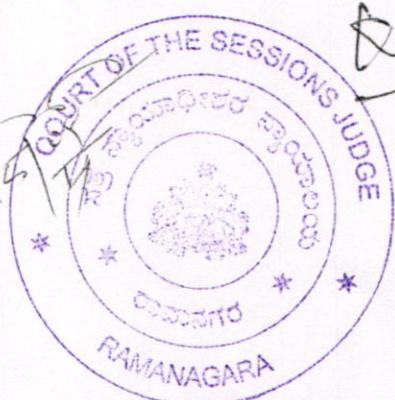

His radiological investigations show he has near normal testicular size with well developed phallus for his age. The Corporal bodies are developed normally and has normal blood flow in the flaccid state. As he refused to consent for Penile Doppler study with intracavernosal injection of vasoactive dilators the committee decided not to go ahead with the injection of intracavernosal injection which would have been useful to assess the vascular causes of impotence.

**OPINION:**

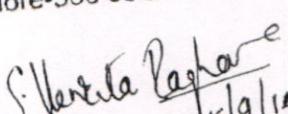

The Medical team which has examined Sri Nithyananda Swamy is of unanimous opinion on basis of relevant History, thorough physical examination aided by Bio-chemical investigation supported by Abdominal Ultrasound and Penile Doppler study that there is no evidence to suggest that the person is incapable of performing sexual act.

There is no clinical signs to suggest that the person was involved in unnatural sexual acts.

He is taking Tablet Metformin for Diabetes Mellitus and Tablet Hydrochlorthiazides for Hypertension both of which may reduce potency . As per the request of the Investigating officer remaining sample of Blood and urine which was collected for Medical tests have been sent to Forensic Science laboratory to detect presence of any drugs which could affect the potency of a person as it was not available at Victoria Hospital. Reports of the Forensic science laboratory are awaited.

**CERTIFICATE OF EXAMINATION**

The Articles sent in Cr. No. 141/10 142/10 of Other, U/S 376, 377, 506, 417, 201, 212, 120B, were received in the Laboratory for examination on 10-Sep-2014 through Somashekhar(I/C: PSI) and Venkatasubbanna(I/C: PSI). The seals found on the article/s were intact and tallied with sample seal. The description found on the article/s correspond to that of those present in the invoice.

**MATERIALS EXAMINED**

Sl.No.	Description of Article/s	IO Marking
1	one sealed cloth packet said to contain Blood in Vaccutainers	1
2	One sealed cloth packet said to contain Urine in plastic bottles.	2

**METHOD OF ANALYSIS**

Article Nos. 1 and 2 are said to be Blood and Urine samples of NITHYANANDA SWAMI (Male/ 38 years) vide letter No: BMCRI/FM/SD/79/14 dated. 08/09/14.

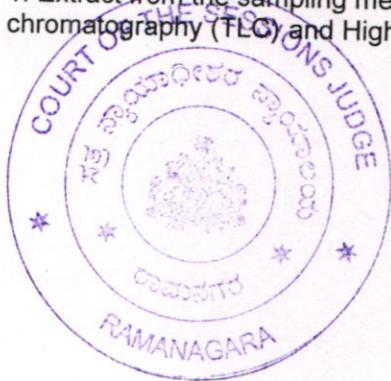

Both the articles are sealed with seal impression as "BMCRIFM"

**SAMPLING**

1. Blood and urine samples were subjected to liquid-liquid extraction (LLE) with Diethyl ether/dichloromethane/ethyl acetate at Acidic, neutral and basic pH. After phase separation, the organic layer was purified, evaporated to dryness and reconstituted with methanol.

**ANALYSIS & IDENTIFICATION**

1. Extract from the sampling method 1 was analyzed for drugs by UV spectrophotometric, thin-layer chromatography (TLC) and High performance thin layer chromatography (HPTLC) methods.

Bangalore.

Sir,

Sub:- Report of the Medical Examination of  
Sri Nithyananda Swamy.

Ref:- 1] No:VH/GNL/51/14-15. Dated: 15.09.2014.  
2] BMCRI/FM/SO/79/2014 Dated 08.09.2014.

- \*\*\* -

With Reference to the above subject, I would like to impress upon you to clarify the following. In your Medical report Dated: 15.09.2014, you have mentioned that there are no clinical signs to suggest that the person was involved in unnatural sexual acts. If so,

1. What are the specific clinical symptoms in a person who has reportedly involved in unnatural sexual acts ?
2. Whether these clinical symptoms can disappear with the passage of time. If so, how long does it take ?
3. Whether taking up the medications mentioned in the report can lead to permanent or temporary erectile dysfunction ? In case of temporary erectile dysfunction, how long can such dysfunction last.

The above points may please be clarified at the earliest.

[B.LOKESH]  
Dy. Supdt. of Police,  
Special Enquiry Division,  
CID, Bangalore.

Deputy Superintendent of Police  
Special Enquiries, C.I.D.,

3/11/2014

**CLARIFICATION FOR THE QUERIES PUT FORTH BY THE DEPUTY SUPERINTENDENT OF POLICE , SPECIAL ENQUIRY DIVISION, CID**

1. What are the specific clinical symptoms in a person who has reportedly involved in unnatural sexual acts?

The clinical symptoms in a person involved in unnatural sexual act will depend upon

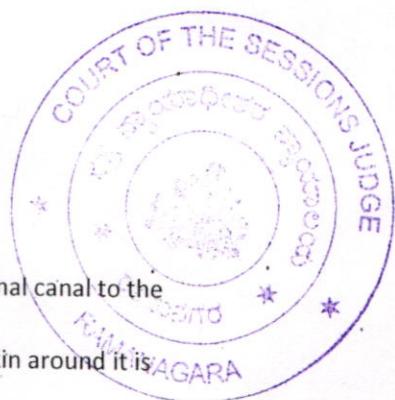

1. Whether the individual is a ACTIVE AGENT
2. Whether the individual is a PASSIVE AGENT

For the ACTIVE AGENT :

1. Abrasions on the prepuce, glans penis, tearing of the frenulum or swelling or redness of penis.
2. Faecal soiling , blood and foreign hairs are likely to be found in the area of coronal sulcus
3. Blood and seminal stains
4. Presence of venereal disease
5. Marks of violence on the body
6. Clothes may show seminal stains or a mixture of semen and faeces
7. Penis may be elongated and constricted at some distance from the glans with twisted urethra in case of habitual sodomites.

For the PASSIVE AGENT:

1. The shaving of anal hair
2. Skin around the anus becomes smooth and thickened extending up into the anal canal to the mucocutaneous junction and sometimes into the upper anal canal.
3. Muscle of the anus loses its tone and does not contract so readily when the skin around it is pinched
4. Slight depression of the buttocks towards the anus due to absorption of fat

Beeby

Keeb

XSL

S. Venkata Rao

(93)

Government of Karnataka  
Bangalore Medical College & Research Institute  
(An Autonomous Institute of Government of Karnataka)  
Victoria Hospital Bangalore.

5. Dilatation and laxity of anus
6. There may be anal fissures, scars etc
7. Absence of fine wrinkles in the anal mucosa
8. Presence of venereal disease.

2. Whether these clinical symptoms can disappear with the passage of time. If so, how long does it take?

Some clinical symptoms and signs like presence of abrasion, blood, semen, faeces disappear with passage of time however some clinical signs like scarring, elongation of penis and constriction of penis, Dilatation and laxity of anus, anal fissures and scars may persist with passage of time.

3. Whether taking the medications mentioned in the report can lead to permanent or temporary erectile dysfunction ? In case of temporary erectile dysfunction, how long can such dysfunction last.

Medications mentioned in the report can lead to temporary erectile dysfunction in few individuals. However the persistence of such temporary erectile dysfunction varies from person to person.
